Karimnagar, India

OBJECTIVE

To leverage my academic achievements and skills to secure a challenging position and contributing to innovative solutions and professional growth.

SKILLS

HTML5	Tailwind CSS	Express.js	Communication Skills
CSS3	React.js	Basic Python	Problem Solving
JavaScript	Node.js	Git and Github	Decision Making

PROJECTS

Score Card Recorder for Cricket

- Utilized React and Recoil to build a dynamic and responsive score recording application for cricket matches.
- Implemented Recoil for efficient and scalable state management, ensuring smooth and real-time updates to the score display.
- Designed and developed an intuitive user interface using Figma, enhancing user experience with clear and accessible score tracking features

Pedestrian and Vehicle Detection in Autonomous Vehicles.

- Utilized cutting-edge technology, including machine learning and Computer Vision (CV), to enhance detection accuracy.
 - Developed an advanced pedestrian and vehicle detection system for autonomous vehicles, ensuring a high level of safety.
 - Designed and implemented swift and accurate detection algorithms, ensuring real-time identification of pedestrians and vehicle with remarkable precision.
 - Implemented real-time data analysis to provide autonomous vehicles with the ability to make split-second decisions in busy environment traffic.
-
